Animal Healthcare

Continuing work towards providing healthcare to stray animals across the national capital region, CGS Hospital's Pasha Wing conducted their monthly vaccination and deworming drive.

ANIMALS PROVIDED FREE AND SUBSIDISED TREATMENT AT PASHA WING IN APRIL 2023

Story in Focus:

A loving and happy dog, Maggi is known to everyone in her neighbourhood. When she didn't greet everyone with her customary tail wag, they knew something was wrong. On closer inspection, she was found shivering and taken to the CGS Hospital. Maggi was diagnosed with a ruptured bladder along with high KFT levels. She was advised surgery, which though risky and critical was undertaken immediately. Post surgery, the CGS Team looked after her with utmost care and monitored her, making sure that they did everything in their capacity to help her recover. Maggi miraculously made it through and recovered completely in a few weeks and is back in her neighbourhood playing with all the people who love her so dearly.
