Animal Healthcare

With the objective to provide the finest animal healthcare services, the CGS Hospital's Pasha Wing continues to conduct the monthly vaccination and deworming drive.

ANIMALS PROVIDED FREE AND SUBSIDISED TREATMENT AT PASHA WING IN MAY 2023

Vaccination Camp

Story in focus

Cookie with Dr Vikash and team

Cookie, a three-year-old cat, was having problems urinating and passing stool for the last four months. It was suggested during the initial consultation that the cat be brought in for a thorough examination and additional diagnostics.

Cookie came in to the CGS Hospital Gurugram on May 15 where she underwent a thorough physical investigation and various other tests, and a tumour was discovered in her pelvic bone. The same day, a CT scan was performed to confirm the tumour. The right pelvic floor was covered by a large tumour that was restricting the rectus muscle. The CGS team led by Dr Vikash successfully executed the surgery and removed the tumour. We are happy to share that Cookie is now on the road to recovery.
