## Story in Focus

### Trickey's Happy Home

When a litter of six puppies were found isolated in a gutter in Delhi, a kind lady brought them to CGS Veterinary Care Hospital's Pasha Wing where they were examined and tested for viral infection. Unable to resist their joy and spirit, one pup, Trickey, immediately found his foster home with our CGS Veterinary Care Hospital's lab technician! We hope all of the puppies find a home soon.

## Story in Focus

### Alexander's Triumph Over Arthritis

Meet Alexander, a canine who embarked on his path to recovery at the CGS Veterinary Care Hospital Pasha Wing. On his first day, Alexander arrived on a stretcher, hindered by moderate hind limb pain that left him unable to stand. A diagnosis revealed severe arthritis and concurrent sarcopenia, painting a challenging picture for our furry friend.

Under the expert guidance and compassionate care of the dedicated CGS Veterinary Care Hospital team, Alexander began a tailored physiotherapy regimen.

Within a short period of time, Alexander started to recover. With improved joint mobility and a significant reduction in pain, Alexander now walks pain free. His journey exemplifies the power of physiotherapy in bringing relief, joy, and improved well-being to our beloved animal companions.

## Health Talk on Preventive Healthcare for Small Animals

CGS Veterinary Care Hospital organised a Health Talk on preventive healthcare for dogs, engaging with pet parents at DLF Aralias. The focus of the conversation encompassed a range of vital topics, including dental hygiene practices tailored to canine needs, valuable nutrition tips for optimal well-being, and personalised lifestyle adjustments that could significantly impact the overall health of their furry companions. The exchange of ideas and information underscored the commitment of these pet parents to ensuring the preventive care and well-rounded health of their beloved pets.

## Training of Veterinary Science Students at CGS

CGS Veterinary Care Hospital imparted practical training and hands-on experience to 100 students from the International Institute of Veterinary Education & Research (IIVR) in Rohtak. This provided a unique opportunity for the student interns to enhance their careers in the veterinary field.
