Introducing Physio and Hydrotherapy Facility for Small Animals

Furthering our commitment to provide rehabilitative care for small animals, a Physiotherapy and Hydrotherapy Facility is being developed at the CGS Veterinary Care Hospital, Gurugram.

The facility will provide customised treatment plans, physical therapy, hydrotherapy, massage & manual therapy, assistive devices, patient monitoring, education and training with the help of experienced medical staff. It is expected to be ready by early next year and will be crucial in helping injured, disabled, or post-operative animals regain their mobility, strength, and overall physical wellbeing.

Story in Focus

The Curious Cat's Recovery

An office cat, lovingly known as AutoCAT (a fun spin on AutoCAD!), was rushed to CGS Veterinary Care Hospital in a state of shock when found sitting near a transformer with singed whiskers and a burnt nose and leg.

After immediate assessment, the cat was admitted by CGS doctors for stabilisation, diagnostic tests, and critical treatment. Despite the mishap, the cat remained jovial and resilient during the recovery process, and has completely recovered.
